HOW TO PREVENT STOLEN AUTOS

- **Always lock you car**
- **Do not leave your keys in your car**
- **Do not leave your car running and unattended**
- **Use a steering wheel locking device such as the “Club”**
- **Consider having a “kill switch” installed**
 - **This is a switch that is placed somewhere in the interior of the car that when in the off position does not permit your car to be started by turning of the key or the forcing of the ignition switch**
